## SCENARIO

How to Import User and User Roles by using IO Import via Excel. This method suitable to use for new created database but need to be access by the same batch of accounting staff.

Company A = Existing Company
Company $\mathrm{B}=$ New created company
*Below is the completed System Role \& System User from Company A and we want apply the same to Company B.

## SOLUTION

1. Login to Company $\mathrm{A}>$ Go to Maintenance $>$ User Roles

|  | QNE TIPS |  |

|  | Product : QNE Optimum | Version: 1.00 |
|  | Doc No : 1 | Page No: 3 of 3 |

2. $\mathrm{Ctrl}+\mathrm{A}$ to select all the record $>$ Right click $>\operatorname{IO}$ Export to XML

3. Choose where you want to save the file

| > Desktop $\square 2020$ Case | 31/12/2020 4:27 PM | File folder |  |
| :---: | :---: | :---: | :---: |
| > Documents $\square$ Quick fix | 24/12/2020 4:21 PM | File folder |  |
| - Downloads $\quad \square$ Delphi Installation | 23/12/2020 3:34 PM | File folder |  |
| $>$ Music Video and guideline for user | 17/12/2020 10:59 ... | File folder |  |
| > Pictures |  |  |  |
| $>$ 國 Videos |  |  |  |
| > $=$ Local Disk (C:) |  |  |  |
|  |  |  |  |
| File name UserRoles |  |  |  |
| Save as type: Xml File(*..xml) |  |  |  |
| ^ Hide Folders |  |  | Cancel |

|  | QNE TIPS |  |
