SCENARIO

Customizing Transaction or Report preview format and wanted to show 'Continue Next Page' when there are more than 1 page

Example:

Company business nature is providing service on maintenance heavy duty machine which require to list out each job in details on Invoice which will have multiple page invoice, so would like to add a label 'Continue Next Page' in preview format with condition: -

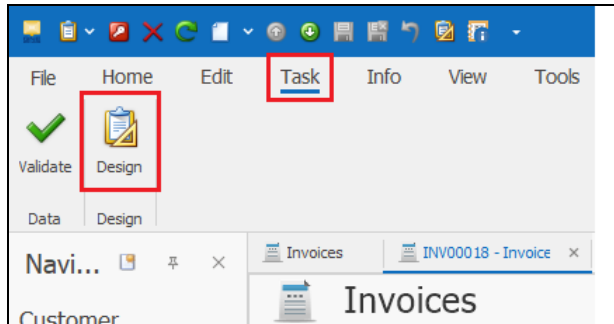

- Show 'Continue Next Page' at the end of page except last page
- Show 'Continue Next Page' when there is more than 1 page invoice

		NET TOTAL	RM	600.00
Notes 1. All invoices should be issued and made payable to SAMPLE TRADING (M) SDN. BHD. 2. All goods are not returnable or exchangeable		Authorized Signature		

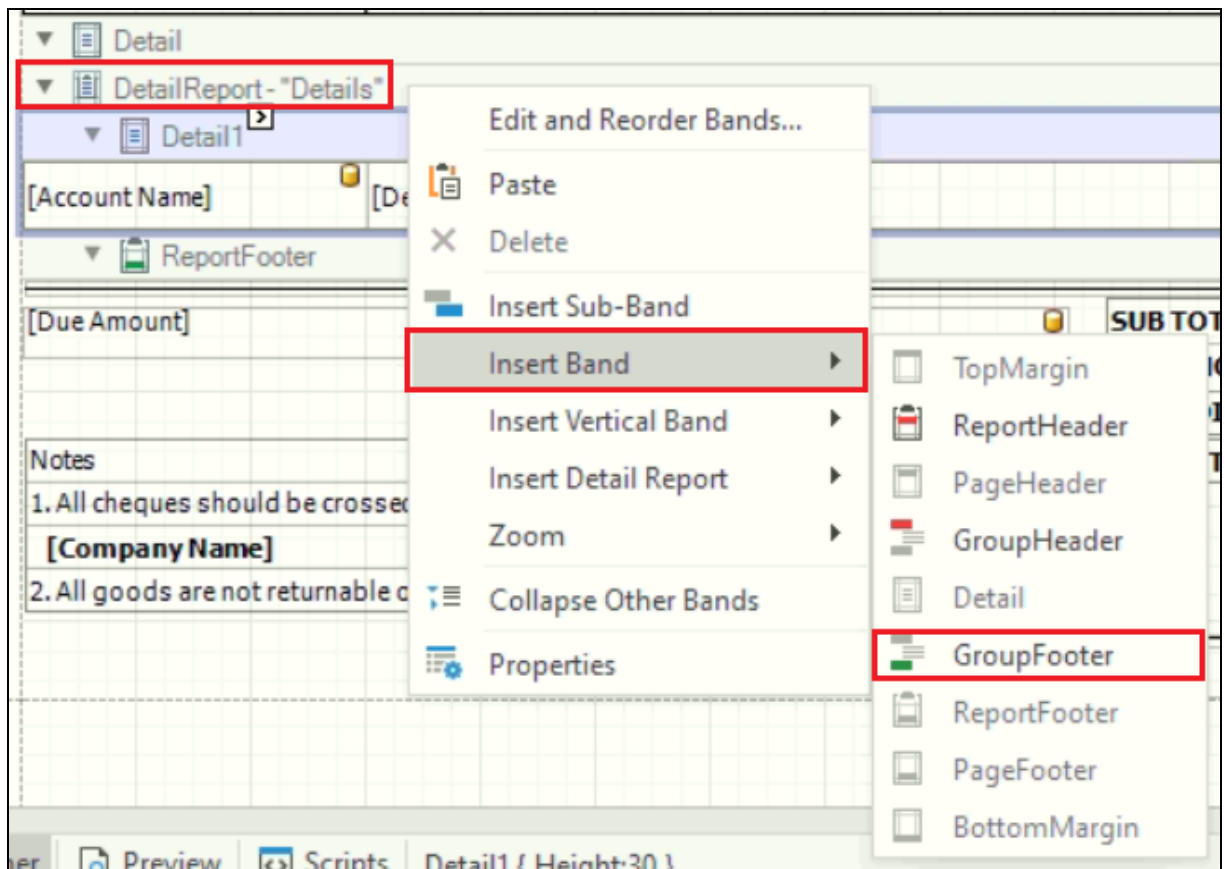

SOLUTION

1. Open your transaction or report, in my example will be customer invoice
2. Go to Task > Select Design

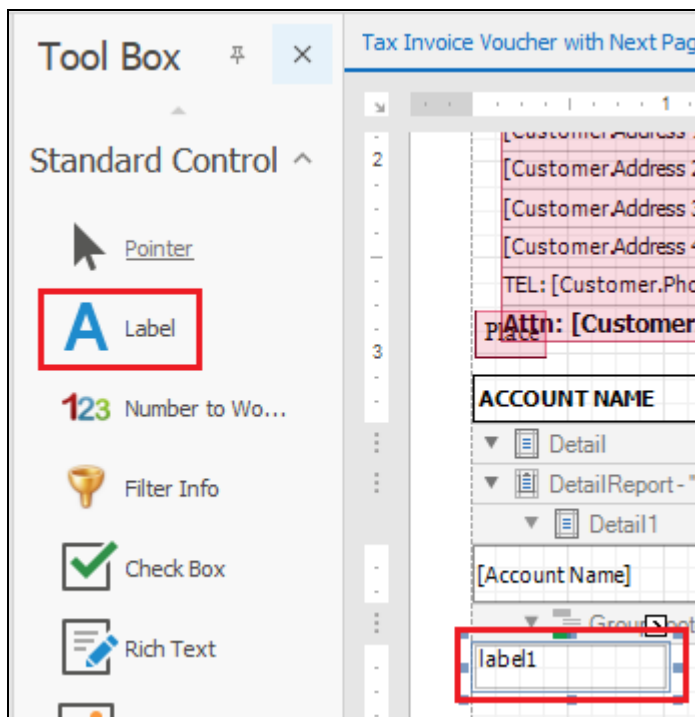

3. Highlight your preview format and select Amend
4. Right-click on Band DetailReport – “Details” > select Insert Band > select GroupFooter

		QNE TIPS	
	Product : QNE Optimum	Version: 1.00	
	Doc No : 1	Page No: 4 of 6	

5. Go to View > Windows > Select ToolBox
6. Drag [Label] into newly added Label

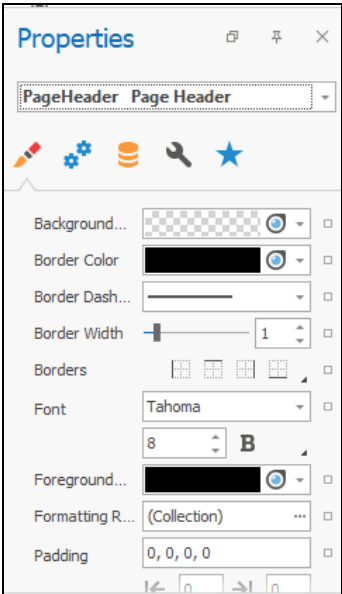

7. Double-click on the label and key in text to be display like 'Continue Next Page'
8. Click on the [>] arrow button on GroupFooter1 and tick checkbox 'Repeat Every Page'

Product : QNE Optimum		Version: 1.00	
Doc No : 1		Page No: 5 of 6	

9. You can design your own appearance on the Properties panel (Right hand side) according to your needs

10. Select the created label 'Continue Next Page' > Right-click and select Properties
11. Select Behavior (Gear icon) and expand Scripts

12. Select Print On Page and select (New)

13. Copy and past below condition into script's content

```
if (e.PageIndex == e.PageCount - 1)
```

```
    (sender as XRLabel).Visible = false;
```

```
else
```

```
    (sender as XRLabel).Visible = true;
```

```

1  using QNE.ERP.Reports.Utils;
2  private void Detail_BeforePrint(object sender, System.Drawing.Printing.PrintEventArgs e) {
3      e.Cancel = ReportHelper.BatchDetailShouldBeHidden(Detail.Report as ReportModel);
4  }
5
6
7  private void label1_PrintOnPage(object sender,
8  DevExpress.XtraReports.UI.PrintOnPageEventArgs e) {
9      if (e.PageIndex == e.PageCount - 1)
10         (sender as XRLabel).Visible = false;
11         else
12         (sender as XRLabel).Visible = true;
13     }

```

14. Click on Validate button > Save and close Report designer

15. Preview with newly created format and you will be able to view the 'Continue Next Page' label on the end of page except last page, it also wont show when there is only 1 page
