1.0	Creation	Jason Lee	01-Oct-2021	

SCENARIO

Delphi database upgrade process was interrupted, maybe due to Server machine suddenly restart/shut down or connection to server machine was lost but when login database no longer prompts upgrade database message.

Recommended to perform re-upgrade database because you may encounter errors

SOLUTION

1. Make sure all users have logout the database
2. You alone login to the database
3. Find out your current database version
4. Go to Help > About
5. In this example, my current Database version is 2014.5.0.752

6. Click OK to close
7. Go to File > Utilities > QNE Management Tools
8. Once QNE Management Tools opened up
9. Go to Tools > Intelligence SQL Queries
10. Tick "Overwrite Generated SQL"

11. Copy and paste below query into query box
12. "SET SYSTEMDATAVALUE =" to your previous database version and set "WHERE SYSTEMDATAVALUE =" to your current database version
```
UPDATE SYSTEMDATA
SET SYSTEMDATAVALUE = '2014.5.0.751'
WHERE SYSTEMDATAVALUE = '2014.5.0.752'
```

13. Click "Execute SQL" button and click "Exit" button
14. Close QNE Management Tools
15. Re-login your database
16. Delphi will prompt request upgrade message again

17. Click "Yes" to upgrade database
