

Preventing Unauthorized Upgrade

Scenario:

If you upgrade the database on one computer, all connected computers also need to be upgraded. If the upgraded database isn't compatible with the current application version, you'll encounter numerous system errors. When it comes to updating software, it's important to make sure only the right people can do it. By controlling who can update the software, we can protect our systems from problems that might happen if someone makes changes without permission.

The solution provided below explains how to control which users are allowed or not allowed to perform upgrades.

Solution

Security System Role - QNE Business Solutions

File Home Edit View Tools Inquiry Maintenance

User Roles Users My Details Projects Financial Period Valid Posting Periods Default Interface Accounts Currencies Terms Areas System Options Running Numbers User Default Form Format Posting Account Groups

Default Maintenance

Security System

Security System Role

Drag a column header here to group by that column

Name	Description
Administrator	System predefined role with minimum required permissions
Default	Manager
Manager	Purchase Department
Purchase	Sales Department
Sales	

2. Permission > Other Operations

Security System Role

Name* ☐ Administrative ☐ Change New Password Every

Description

Permissions Users Roles

Data Operations Other Operations Dashboard Transactions Reports Current Permissions

View Variants

Operation	Allow
Access Web Application	<input checked="" type="checkbox"/>
Access Windows Application	<input checked="" type="checkbox"/>
Allow Create Stock Batch Number	<input checked="" type="checkbox"/>
Allow Mark Documents as Bounced/Revert Cheque	<input checked="" type="checkbox"/>
Allow Mark Documents as Cancelled	<input checked="" type="checkbox"/>
Allow Mark Documents as Closed	<input checked="" type="checkbox"/>
Allow Mark Documents as PD Cheque	<input checked="" type="checkbox"/>
Allow Mark Documents as Received	<input checked="" type="checkbox"/>
Allow Select Stock (In) Batch Number	<input checked="" type="checkbox"/>
Allow To Edit Transferred Document's Header	<input checked="" type="checkbox"/>
Allow to Eject Cash Drawer in Cash Sales	<input checked="" type="checkbox"/>
Customization Center	<input checked="" type="checkbox"/>
Customize Layout	<input checked="" type="checkbox"/>
Database Backup	<input checked="" type="checkbox"/>
Database Restore	<input checked="" type="checkbox"/>
Database Upgrade	<input checked="" type="checkbox"/>

3. If the access right is ticked, user can perform software upgrading. For more info about how to upgrade please refer this KB
<https://support.qne.com.my/support/solutions/articles/81000384965-how-to-upgrade-database->

3. if the user is not allowed to perform software upgrading, maybe he or she is the executive level, you can untick the setting.

When the user trying to upgrade the software, system will prompt message as below
